

# ALPHA LINEA

## KEY HIGHLIGHTS

7 Major Forex Currency Pairs Traded. (Spot FX)

## STRATEGY DESCRIPTION

This Quantitative intraday trading portfolio consists of trading strategies based on quantitative analysis on G10 currency pairs which rely on mathematical computations and number crunching to identify trading opportunities. Price and volume are two of the more common data inputs used in quantitative analysis as the main inputs to mathematical models. Manual strategies such as price action strategies are implemented if an opportunity arises.

### Signal Generating Advisor [EA]

For signalling we use 12 fully adjustable indicators on different time frames. 2 of these indicators are fully in-house designed. The other 10 indicators are partially customised according to our own specifications.

A very important factor in our whole system is an in-depth analysis of each instrument separately to determine the most efficient entries and exits. We've designed and configured our system with optimisation back tested at a minimum of 10 years. We always use 100% correct historical tick data for all of our back testing. For testing high performance computing [HPC] is applied "supercomputers" with a minimum 128 cores, 1TB RAM are used.

Furthermore applied in our signal process is AI and deep learning. This drastically improves results. The EA will store each profit and loss trade executed in the past, and will determine how to avoid the losing entries and how to optimise the profitable entries/exits by auto-adjusting its settings based on the most recent trades in that 'zone'.

AI market scanning system; the system measures at the correlations of the whole market in different time frames to determine if a certain trade is executed or cancelled. This is a very complex logical/mathematical process and this drastically improves the drawdown/profit ratios.

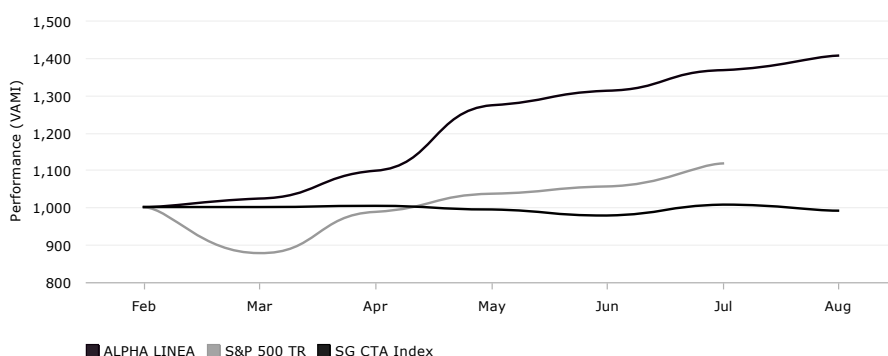

## DISCLAIMER

**ELYSIUM CAPITAL LTD AND/OR ITS SUBSIDIARIES ARE NOT DIRECTLY OR INDIRECTLY INVOLVED IN THE OFFERING OF SECURITIES.**

Elysium Capital Limited itself does not carry out any regulated activities, the only exclusive activities we carry is Prop Trading and Professional Training and consequently is not required to be authorised by the regulatory authority. All of Elysium Capital's preferred clearer do conduct regulated activities and are authorised to do so by regulatory authority.

We are a Fintech access provider and signal provider. We develop trade signals per quantitative analysis. We grant access to the data on trading portfolio operations allowing other participants to auto-copy signals automatically on their own trading accounts via a 3rd party independent prime brokerage, not being Elysium Capital Limited or any of our subsidiaries. We do not have direct clients, nor do we provide any investment services or ancillary services to others. Participants can utilize our trading signals and have them auto-copied via a managed account at a 3rd party independent prime brokerage.
